Villa Mas Indah, Bekasi Utara, Bekasi, Jawa Barat

I am a graduate of the Diploma IV program in Internet Engineering Technology from Gadjah Mada University with a strong interest and experience in Data Analytics. I am a Data Analyst with expertise in SQL, Python, and Power BI, specializing in data extraction, transformation, analysis, data modeling, DAX calculations, query optimization, and developing interactive dashboards to generate actionable insights and support strategic decision-making. I have professional experience in the FMCG industry, where I handle data analysis, reporting, and business intelligence solutions to support business performance and operational needs. I am also experienced in managing end-to-end projects, collaborating with clients and stakeholders to gather requirements, discuss application and web enhancement needs, identify improvement opportunities, and manage revision processes to ensure digital solutions align with business objectives. With strong analytical thinking, problem-solving skills, communication abilities, and project management experience, I am committed to delivering impactful data-driven solutions that create business value.

Education Level

Universitas Gadjah Mada - Yogyakarta, Indonesia <i>D4 Internet Engineering Technology, 3.66/4.00</i>	Sep 2021 - Jul 2025
SMAN 4 Bekasi <i>MIPA, 84.00/100.00</i>	Jul 2018 - Jun 2021

Work Experiences

PT Pitjarus Teknologi - Bekasi, West Java <i>Data Operations Support</i> - Performed data mapping, data validation, and data preparation processes to ensure data accuracy and consistency across multiple sources. - Developed and optimized SQL queries for data extraction, transformation, aggregation, and reporting needs to support business analysis. - Designed and developed interactive Power BI dashboards, including data modeling, DAX calculations, KPI monitoring, and data visualization to provide actionable business insights. - Analyzed business requirements and translated complex data into meaningful reports and dashboards to support decision-making processes. - Served as the main point of contact between the company and clients, especially for clients with technical requirements and system-related needs. - Acted as a bridge between clients and internal support/engineering teams to communicate issues, troubleshoot problems, and ensure effective solutions. - Conducted client discussions and requirement gathering sessions related to application and web enhancement requests, including analyzing improvements and coordinating revision processes. - Provided technical training and application guidance to clients/users to ensure proper understanding and effective utilization of the system.	Aug 2025 - Present
Satuan Penjaminan Mutu dan Reputasi Universitas Gadjah Mada - Sleman, Yogyakarta <i>Data Analyst</i> - Processing data documents such as Quality Manual, Quality Standards, and Evaluation Forms. - Manage study programme and faculty data in the process of applying for BAN-PT accreditation or international institutions (such as ABET, AUN-QA). - Processing academic performance data (such as learning outcomes, lecturer-student ratio, scientific publications). - Provide data-based insights and recommendations for quality improvement. - Ensure data integration with university systems - Manage the Website Dashboard periodically	Oct 2024 - Mar 2025
PT Parama Data Unit - Sleman, Yogyakarta <i>Machine Learning Engineer Intern</i> - Develop and deploy machine learning models to detect and estimate the volume of rocks on shale shakers using image and/or video data. - Preprocess and annotate datasets including video feeds and sensor data from drilling operations. - Design and implement deep learning algorithms (e.g., CNNs) for object detection, segmentation, and volume estimation. - Collaborate with data engineers to integrate ML models into real-time monitoring systems. - Conduct model evaluation, tuning, and performance optimization under field conditions.	Sep 2024 - Jan 2025

- Work closely with drilling and field experts to validate results and improve model accuracy.
- Document model development processes and generate technical reports for stakeholders.
- Ensure the robustness, scalability, and efficiency of the deployed ML solution in industrial environments.

PT Ionesia Solusi Data - Tebet, Jakarta

Aug 2023 - Dec 2023

Data & Reporting Intern

- Source data from various social media platform and digital channels
- Manage and organize collected data for easy access and retrieval.
- Analyze data to extract meaningful insights and identify key performance indicators (KPIs).
- Conduct pre-insight analysis to uncover potential trends and insights.
- Collaborate with cross-functional teams to define analysis objectives and questions.
- Ensure data compliance with privacy regulations and company policies.
- Generate reports and visualizations to communicate findings effectively.

PT Global Data Inspirasi - Sleman, Yogyakarta

Apr 2023 - Aug 2023

Data Analyst Intern

- Analyzing data and visualizing data with the output obtained is made into an article
- Create a dashboard using google data studio (Looker Studio)
- Make an analysis of the data that has been provided
- Perform data cleaning and validation to ensure accuracy before analysis.

Organisational Experience

Komunitas Mahasiswa TIK UGM - Sleman, Yogyakarta

Feb 2023 - Jan 2024

Staff, Internet of Things (IoT) Division

- Learn about Internet of Things
- Make IoT projects

Forum Komunikasi Teknologi Rekayasa Internet (FORKOMTRI) - Sleman, Yogyakarta

Feb 2023 - Mar 2024

Head of Division Cyber Militia

- Coordinating support and appreciation for TRI students or contingents who are currently competing.
- Coordinate in appreciation When TRI students graduate in graduation.

Forum Komunikasi Teknologi Rekayasa Internet (FORKOMTRI) - Sleman, Yogyakarta

Apr 2022 - Feb 2023

Staff, Cyber Militia Division

- Coordinating support and appreciation for TRI students or contingents who are currently competing.
- Coordinate in appreciation When TRI students graduate in graduation.

Router On - Sleman, Yogyakarta

Sep 2022 - Oct 2022

Coordinator, Equipment Division

- Coordinate and organize equipment during the event.
- Coordinate the needs of goods with other divisions.

Berinisiatif dan Berusaha (BIRU) - Sleman, Yogyakarta

Feb 2020 - Feb 2021

Staff, Sponsorship Division

- Looking for sponsors for the events being held.
- Participate actively in organized events.

Skills, Achievements & Other Experience

- **Projects** 📌: Customer Review Clustering K-Means (Machine Learning Project, 2024), Image Classification (Machine Learning Project, 2024), Social Media Labelling (Data Analyst Project, 2024), Tourism Village Dashboard (Data Analyst Project, 2023), Hotel Recommendation (Data Analyst Project, 2023), Smart CCTV using ESP32Cam (Internet of Things Project, 2023), Website Training (Website Project, 2023)
- **Hard Skills**: Microsoft Office, SQL, Python, PostgreSQL, PowerBI, Looker Studio, Tableau, Classification, Github, Modelling , system automation, Internet of Things (IoT)
- **Soft Skills**: Problem Solving, Analytic Skill, Teamwork, Time Management, Adaptability, Public Speaking
- **Certifications** 📌: MikroTik Certified Network Associate (2025), Belajar Machine Learning untuk Pemula (2024), Belajar Dasar Visualisasi Data (2024), Memulai Pemrograman dengan Python (2024), Belajar Dasar Structured Query Language (SQL) (2023), CCNAv7: Introduction to Networks (2022)
- **Portfolio** 📌: Portofolio Data Analyst, Machine Learning, and Internet of Things (IoT)
